**Features:**

- Compact design
- Actuator with rolling diaphragm
- Actuator mountable in any position
- Travel up to 65 mm
- DP32-34: Direct or reverse acting
- Burnished stem protected by bellow
- Max. air supply pressure 6 bar
- High spring thrust
- Maintenance-free O-ring sealing with flexible guiding
- Assembly of additional devices acc. to DIN IEC 60534-6
- Operative ambient temperatures -10°C up to +100°C (DP32-34 optional: -50°C up to +100°C)
- Favourable size / performance ratio

**Pneumatic actuator ARI-DP32 / 33 / 34**
**Operating mode: Extended stem on air failure**

**Operating mode: Retracted stem on air failure**

Air supply pressure max. to actuator: 6 bar

When using accessories, the corresponding air consumption has to be observed.

Type of actuator		DP35 4-column mounting
Ø A	(mm)	755
H1 *	(mm)	984
L1 *	(mm)	420
A1	(mm)	250
Ø D2	(mm)	34
M1	(mm)	M27
L3	(mm)	40
M2	(mm)	M27 / M36 x 1,5
E max.	(mm)	45
G	(inch)	1
Weight	(kg)	325

\* The construction heights H1 of the actuator units vary due to the different lengths of the distance columns L1, which results from the excess length of the stem (S = 98mm, 130mm), and the different spring ranges (bench settings) of the actuator units.

**Top mounted handwheel** (refer to page 18)

**3/2-way solenoid valves**

directly controlled with manual operating device

(Air is vented in the rest position  
(incl. standard female connector)

**Throttling valves**

(Increases operation time in 'open' or 'closed' direction)

**Check valve with throttling function**

(Increases operation time in 'open' or 'closed' direction)

**Lock-up valve**

(Holds the air in the actuator in the event of air failure)

**Air set including gauge**

(Reduces air pressure and removes dust and water droplets)

**Limit switch**

(to denote end of travel)

**electrical (mechanical)**

**opener / shutter**

**Limit switch**

(to denote end of travel)

**inductive (contactless)**

**opener / shutter**

**Proximity sensors**

(to denote end of travel in housing)

**Position indicator**

(analogue feedback of valve position in housing)

**Pneumatic and electropneumatic positioner with column design**

(allocation of valve control and control signal)

**Special design**

 Actuators for sub-zero temperatures -40°C to 100°C  
(on request)

 Actuators for aggressive environments  
(on request)

 DP in short design  
(on request)

 Top mounted handwheel - short design  
(on request)

**Application**

The single acting pneumatic actuators series DP are designed to be mounted directly on control valves and stop valves. They supply large forces for the valve operation with short (1-10 seconds) lifting times on air supply or on air failure.

Please contact the supplier or manufacturer if there are any questions.

**Set up and operation mode**

The pneumatic actuators series DP converts pneumatic pressure into a linear travel at the actuator stem. Depending on the air supply pressure and different control signals the actuator is producing appropriate forces at the stem.

Depending on the air supply pressure and different control signals the actuator is producing appropriate forces at the stem.

Thus following operating modes can be achieved: „Extended stem (on air failure) or „Retracted stem (on air failure).

The compression springs and also the rolling diaphragm are laied out for approx. about one million double travels.

**Please indicate when ordering:**

- Type of actuator
- Operating mode
- Spring range
- Nominal travel
- Connection dimensions of the valve
- Accessories

**Example:**

ARI-DP34; Operating mode: extended stem on air failure; 1,5 - 3 bar; travel 50 mm; A = 100 mm; stem excess length = 83 mm; M2 = M12; E = 15 mm.

**Technology for the Future.**
